Fact Sheet

Knock-Outs Removal Tool (MT-900043) For optional connectors in MT-900042 General Purpose Enclosure

MTI recently introduced the new MT-900042 General Purpose Enclosure with Integrated Antenna, to complement its field proven enclosure kits (1 foot & ½ foot).

Enclosure

The enclosure is made of die-cast aluminum alloy with built-in **grounding** and **shielding** of the internal electronic board.

The unit is dust and waterproof (**IP67**) thanks to the high quality materials and a gasket.

The enclosure features a female to female RJ45 Ethernet connector for maximum flexibility.

The connector is waterproof and includes a strain relief.

Knock-out holes at the bottom and on top of the case allow easily adding different connectors and up to five additional antennas for **MIMO** applications.

A lightweight, heavy duty mounting kit (die cast aluminum) allows **Vertical** or **Horizontal** polarization, as well as **Dual Slant** wall or pole **mounting**, with a wide angle tilt.

Knock-Outs Removal Tool

In order to facilitate opening up the Knock-out holes, we prepared a special tool to make use of those optional holes at your preference.

The Knock-Out Tool (MT-900043) is a simple devise allowing you to benefit from those options.
